DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: The signs "25a" and "24a" are in the drawings. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claim 27 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 4. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim

Page 3

does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 27 recites the broad recitation a pitch dimension which is 2 to 30 times, and the claim also recites "preferably 5 to 20 times and particularly preferably approximately 10 times larger" which is the narrower statement of the range/limitation.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1, 3 and 26-29 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Green et al.

Green et al discloses a fuel injection valve comprising all the featured elements of the instant invention. See Figures 1, 2 and 4b.

Application/Control Number: 10/554,713 Page 4

Art Unit: 3752

7. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Varble et al.

Varble et al discloses a fuel injection valve comprising all the featured elements of the instant invention. See the Figure and col. 2, line 54 through col. 3, line 18.

Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. Claims 3, 26-34, 36 and 41-43 rejected under 35 U.S.C. 103(a) as being unpatentable over Varble et al in view of Green et al.

Varble, as discussed above, discloses a fuel injection valve comprising all the featured elements of the instant invention, except for the pole lands having an asymmetric configuration, the pole lands have a pitch dimension 10 times larger than an air gap between the yoke and armature, the pole lands having a polygonal shape arranged parallel to one another and at least two neighboring pole lands being surrounded by the coil arrangement in a meander fashion.

Green et al, discloses a fuel injection valve as discussed above, note specifically Figures 2, 4a and 4b, concerning the asymmetric configuration, pitch dimension, polygonal shape and coil arrangement in a meander fashion. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the fuel injection valve of Varble modified to include the coil and yoke arrangement of Green et al, since such a modification would further

enhance the operation of the Varble et al fuel injection valve by achieving faster response times and a higher actuating force.

Page 5

10. Claims 38-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Varble et al in view of Green et al as applied to claim 26 above, and further in view of Wakeman.

Varble, as modified by Green et al, discloses a fuel injection valve comprising all the featured elements of the instant invention, except for radially oriented gaps and the armature arrangement formed by two strip portions and having slots or elongated holes. Wakeman discloses a fuel injection valve, note specifically yoke arrangement with radially oriented gaps 70/87, see Figure 2 and the armature formed by two or more strip-shaped portions and having slots 100, see Figure 6. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the fuel injection valve of Varble, modified by Green et al, to include the gaps in yoke arrangement and the armature arrangement formed of two or more strip-shaped portions with slots as taught by Wakeman, since such a modification would further enhance the operation of the Varble et al, as modified by Green et al, fuel injection valve since the inclusion of slots which increases the amount of skin reduces the cross-sectional area for steady-state flux, to create the desired transient magnetic force across the magnetic gaps of the magnetic circuit.

Allowable Subject Matter

11. Claims 35 and 37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3752

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rieger et al, Greif and Benson et al show various types of fuel injection valves.

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to STEVEN J. GANEY whose telephone number is (571)272-4899. The examiner can normally be reached on 9:00-5:00; Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Len Tran can be reached on 571-272-1184. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
